

PLATFORM D-RISK LIMITED

PROCUREMENT POLICY

Platform D-Risk Limited (PDR) is a world class services business operating throughout the UK.

Sustainable Procurement is how PDR procures its goods, services, works and services in a way that achieves value for money on a whole life basis in terms of generating benefits to society and the economy whilst striving to have a positive impact on the environment.

Our procurement decisions are based on best value and consider the environment, social and economic impact of activities through design, material selection, manufacture, transportation and usage and disposal options. This will be delivered through a high performing supply chain.

This policy delivers the sustainable procurement elements of our strategy and supports our wider sustainability aspirations by working with our supply chain to adopt sustainable practices. We will work closely with stakeholders to ensure that we:

- Embed zero harm into all our activities and that of our supply chain.
- Derive value from a progressive approach to supply chain diversity and inclusion.
- Are recognised as an industry leader in managing and improving our supply chain
- Pay our supply chain promptly
- Create supply chain opportunities for local and national suppliers alike
- Reduce direct and indirect greenhouse gas emissions under our control
- Embed zero waste thinking into our supply chain
- Collaborate with our supply chain to innovate
- Procure materials from recognised responsible sourcing schemes where we control the specification

Responsibility for this policy ultimately lies with the Joint Managing Directors. The implementation of this policy is the collective responsibility of all employees, agents, suppliers and subcontractors.

This policy and its associated guidance will be reviewed periodically and amended as necessary.
